

### Is climbing in the treetops safe?

Yes. Here at AbenteuerPark Potsdam, we use the Expoglider which is a personal continuous belay system that allows the user to pass from climbing element to climbing element, without having to unclick from the safety cable above. This allows easy handling and is so ideal for larger groups such as school classes and business events. Our systems meet the highest safety standard and guarantee that our park is fully equipped with the most recent technological norms. Our ParkRangers are highly trained and qualified and will help you with your climbing equipment as well as talk you through our safety introduction prior to your climb. The team at AbenteuerPark Potsdam has taken all the necessary steps to ensure our activities are safe, as long as you stick to the park safety rules.

### How much do I have to pay?
